

## **P&R Specialty Job Post**

### **Machinist**

P&R Specialty, Inc. the leading manufacturer of Plywood Reels, Fiber Spools and Plastic Spools serving the wire and cable industry for 30 years is seeking a Machinist to join their growing team. This is a hands-on position and will require working with injection molds and stamping dies, as well as general machining and utilizing both manual machine tools, such as lathes, surface grinders, Bridgeports, etc., as well as cnc equipment that operates with MasterCam software.

Key performance objectives in order of priority are:

1. Works in conjunction with Tool Room Manager to plan and design new projects or tools to support the company's growth opportunities.
2. Utilizes manual machine tools and cnc equipment to produce machined components accurately and timely according to print, drawing, prototype or verbal instruction to support the company's manufacturing process.
3. Follows safe work practices and established tool room procedures to maintain an accident-free, organized work environment that allows for the production of quality parts within specified tolerance.

This is a very hands-on position that requires a minimum of five years of experience working in a machine shop. The successful candidate must have exceptional attention to detail and the ability to remain focused on the objectives.

Compensation will be structured around the individual and their capability. Benefit package includes health insurance, vacation and holiday pay, 401(k). Pre-employment drug screen and physical are required.

P&R Specialty is located in Piqua, OH. Qualified candidates should submit their resume and compensation requirements to [ablankenship@prspecialty.com](mailto:ablankenship@prspecialty.com).
